

SUPPLEMENTARY TABLE 1. Descriptive statistics depicting differences between genders regarding their information sources preference on vaccination (Greece, 2020; N: males = 243; females = 440). The medians of the responses in the 7-point Likert scale questions (1: never ... 7: always), along with their interquartile range (IQR) are presented.

<b>Information sources</b>	<b>Gender</b>	<b>Median</b>	<b>IQR</b>
<b>Press</b>	Male	3	4
	Female	2	3
<b>Radio</b>	Male	2	4
	Female	2	2.25
<b>Television</b>	Male	3	4
	Female	2	3
<b>Electronic Press</b>	Male	4	4
	Female	3	4
<b>Health-care workers</b>	Male	6	3
	Female	6	2
<b>WHO</b>	Male	5	3.5
	Female	6	3

SUPPLEMENTARY TABLE 2. Descriptive statistics depicting differences among age groups of the respondents regarding their information sources preference on vaccination (Greece, 2020; N: 13-30 years old = 217; 31-50 years old = 279; > 51 years old = 187). The medians of the responses in the 7-point Likert scale questions (1: never ... 7: always), along with their interquartile range (IQR) are presented.

<b>Information sources</b>	<b>Age groups</b>	<b>Median</b>	<b>IQR</b>
<b>Press</b>	13-30 years old	2	2
	31-50 years old	2	3
	> 51 years old	3	4
<b>Radio</b>	13-30 years old	2	2
	31-50 years old	2	3
	> 51 years old	3	4
<b>Television</b>	13-30 years old	2	3
	31-50 years old	2	3
	> 51 years old	3	4,5

SUPPLEMENTARY TABLE 3. Descriptive statistics depicting differences between genders regarding their views on the safety of vaccination (Greece, 2020; N: males = 243; females = 440). The medians of the responses in the 7-point Likert scale questions (1: strongly disagree ... 7: strongly agree), along with their interquartile range (IQR) are presented.

<b>Statements</b>	<b>Gender</b>	<b>Median</b>	<b>IQR</b>
Vaccines are rigorously tested before they are approved for use	Male	6	2
	Female	6	1
Vaccines often cause side effects	Male	4	2
	Female	5	2
Many actions to spread certain new vaccines are aimed at financial gain	Male	5	2,5
	Female	5	2

SUPPLEMENTARY TABLE 4. Descriptive statistics depicting differences among age groups of the respondents regarding their views on the importance and safety of vaccination (Greece, 2020; N: 13-30 years old = 217; 31-50 years old = 279; > 51 years old = 187). The medians of the responses in the 7-point Likert scale questions (1: strongly disagree ... 7: strongly agree), along with their interquartile range (IQR) are presented.

<b>Statements</b>	<b>Age groups</b>	<b>Median</b>	<b>IQR</b>
All people should get the usual vaccines	13-30 years old	6	2
	31-50 years old	7	1
	> 51 years old	7	1
Vaccines are important to my protection	13-30 years old	6	2
	31-50 years old	7	1
	> 51 years old	6	1
Vaccines are rigorously tested before they are approved for use	13-30 years old	5	2
	31-50 years old	6	1
	> 51 years old	6	1
Vaccines are important for children	13-30 years old	6	2
	31-50 years old	6	1
	> 51 years old	6	1
Vaccines are important for vulnerable groups	13-30 years old	6	2
	31-50 years old	6	1
	> 51 years old	6	1
